

Composting is a beautiful thing

A better compost bin for your home & our future.

Buy the bin

Don't call it a trash can

The Poplar Smart Bin was designed to fit your home, your countertop, and your daily meal prep rituals. No unsavory smells, no handsfull moments, and no wasting of your precious counter space.

Shop

★★★★★

I'm new to composting and admittedly bought this bin for it's clean and modern aesthetic. However, after using it, I must say I'm also impressed with the clever design (the lid fits on the edge of the bin so you don't have to place it on your counter) and cool app that tracks your waste diversion over time.

Poplar Customer

Designed from the ground up, and back again

Designed for Home

A bin deserving of your time, attention, and counter space. The Smart Bin was designed as a timeless addition to replace bins that have outstayed their welcome.

Designed for Humans

Designed with you in mind. The Smart Bin was created to fit your life and solve the issues that humans - like you - have faced for years with other countertop bins.

Designed for Humanity

Food waste is a major contributor to our current climate crisis, with a large portion originating right here at home — stay connected to your impact.

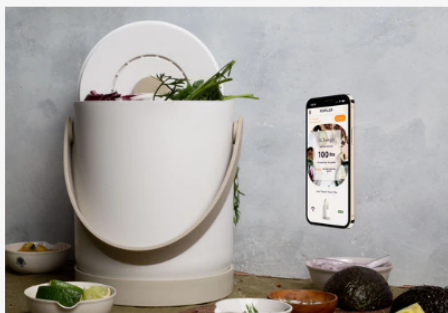

Make an impact with each meal

1. Get the Smart Bin

2. Collect food scraps

3. Track your impact

4. Choose your local compost path
